# Owner-only SMS development test consent

Spearis Marketing · Miami, Florida

This planned program uses fictional service data and the owner's authorized personal phone to test SMS delivery reporting, inbound messages, one human response through Spearis Inbox, HELP/STOP handling and duplicate prevention. Testing begins only after the required provider approval, secure configuration and separate test authorization. This program is not open for customer enrollment.

Owner name: _____

Authorized mobile number: _____

Select each purpose you authorize. All boxes start unchecked:

[ ] Fictional completed-job review-request SMS testing.

[ ] Fictional service-reminder SMS testing.

[ ] One human-written Spearis Inbox response to my test-phone message.

I expressly consent to the selected SMS test purposes at the number above. Consent is voluntary and is not a condition of purchase. My number must be restricted in the test configuration before any send. Signing records consent only; permitted sends still require the separate controlled-test authorization.

Frequency: Up to two application-originated messages in this checkpoint: one sender-test message using one selected service template, plus one inbox reply. This is not one sender test per service. Additional provider-generated responses may follow participant-initiated HELP, STOP or START messages. No recurring customer enrollment is authorized.

Message and data rates may apply. Reply HELP for help or contact spearismarketing@gmail.com. Reply STOP to opt out. START does not automatically remove Spearis's suppression record. Carriers are not liable for delayed or undelivered messages.
